

SITUATIONAL UPDATE BY COUNTRY

AS AT 04 OCTOBER 2020

SINGAPORE BORDER CONTROL MEASURES

For Singapore Residents and Long-term Pass Holders

Singapore has eased travel restrictions for short term visitors from Brunei and New Zealand under the Air Travel pass. Business travellers from 6 regions in China, Japan and the Republic of Korea can travel under the reciprocal Fast or Green Lane, while Malaysians can travel under the Periodic Commuting Arrangement and reciprocal Green Lane.

Incoming travellers from certain low-risk places will serve a shorter stay-home notice of seven days, down from 14 days. Places in this category include Australia (excluding Victoria state), China, Macau, Taiwan, Vietnam and Malaysia.

With effect from 10 August 2020, all incoming travellers, including Singapore Citizens, Singapore Permanent Residents, Long-Term Pass holders, Work Pass holders and their dependents, entering Singapore who are serving their SHN outside of SHN dedicated facilities will need to don an electronic monitoring device throughout the 14-day SHN. Those aged 12 and below will be exempted from this requirement.

Singaporeans are still advised to defer all non-essential travel abroad. However, essential business and official travel will be permitted under Green/Fast Lane arrangements. Currently Green lane is only available with China, Malaysia, Japan and The Republic of Korea. The Singapore government is discussing with more countries in Asia to establish more Green lanes.

Singapore Covid situation update as at 04 Oct 2020

Summary as at 04 October 2020

Based on the current spread of Covid 19 in the various regions, we have made the following observations:

1. In SEA, except for the spread flattening in Singapore, infections in Malaysia and Philippines are spiking periodically while Indonesia is still on the increase. However, Timor Leste seems to have flattened out.
2. In Indochina, the spread seems to be flattening in Thailand, Vietnam and Cambodia but still on the rise in Nepal and Myanmar.
3. In South Asia, the spread is still escalating in India, but mostly flattening out in Sri Lanka, only spiking occasionally.
4. In East Asia, the spread in Japan has been on the downward trend since end August, but flattening in Mongolia, Taiwan and China.
