SITUATIONAL UPDATE BY COUNTRY

AS AT 06 DECEMBER 2020

SINGAPORE BORDER CONTROL MEASURES

For Singapore Residents and Long-term Pass Holders

As the global situation improves with countries/places at various stages of putting in place effective systems to control the COVID-19 infection, Singapore will implement progressive changes as we re-open to international travel. More information on Singapore's border control measures and public health requirements can be found at the **SafeTravel website**.

Singapore residents are advised to defer all other forms of travel overseas. Travellers are advised to check the entry requirements imposed by the countries/regions they intend to travel to.

From 23 Nov, all travellers entering Singapore from Malaysia or Japan will have to serve a 14-day stay-home notice period at dedicated facilities, the Ministry of Health (MOH) said.

Travellers who are not Singaporeans or permanent residents entering Singapore from high-risk countries will need to take a COVID-19 Polymerase Chain Reaction (PCR) test within 72 hours before their departure.

However, travellers from low-risk territories are exempted from this requirement. These include individuals from: Brunei, New Zealand, Vietnam, Australia, Mainland China, Macao, Malaysia (except Sabah), and Taiwan.

A travel bubble between Singapore and Hong Kong for leisure travel has been further postponed to 2021 due to a surge in Covid 19 cases in Hong Kong.

Singapore Covid situation update as at 06 Dec 2020

Recovered cases 61,273

Deaths 384

- Recovery Movement Control Order (RMCO) Has been extended to 31 Dec by the Malaysian Prime Minister.

- The Conditional Movement Control Order ended as scheduled on Dec 6 for most states. However, it has been extended until Dec 20 for Kuala Lumpur, Sabah, most of Selangor, as well as some parts of Johor, Negeri Sembilan, Kelantan and Perak.

- From 10 Aug, Long-term pass holders and those on essential or official business will be allowed to enter Malaysia after taking Covid-19 swab tests and allowed to stay for 3 months before returning.

- Singaporeans and other tourists are not allowed to enter Malaysia on a social visit pass during the RMCO period.

- Flights between Singapore and Malaysia have been available from July. These flight support Malaysians and Singaporeans who are PRs, have Long Term Work pass or are approved to travel under the Green Lane.

Philippines Covid situation update as at 06 Dec 2020

Confirmed cases 442,765

Recovered 409,000

Deaths 8,600

- All regions in the Philippines remain under some level of quarantine restricting movement until 30 Nov. Even as quarantine restrictions are progressively lifted in the Philippines, localised lockdowns may be implemented in specific areas on short notice depending on the local COVID-19 situation.

- Metro Manila in Luzon and a few cities in Visayas and Mindanao remain under general quarantine restrictions with more businesses and public transport allowed to partially operate on condition people wear face masks and shields and stay safely apart.

- Foreign nationals permitted to enter must secure a pre-booked accredited quarantine facility and a pre-booked COVID-19 testing provider. They must cover their own costs of quarantine and/or testing.

- There are limited flights between Singapore and Manila currently.

# Nepal Covid situation update as at 04 Dec 2020

Confirmed cases 242,000

Recovered 227,000

Deaths 1,614

- Nepal's biggest city of Kathmandu and its surrounding areas account for more than one-third of all infections, and authorities said cases were on the verge of slipping out of control.

- COVID-19 risk in Nepal is high. CDC recommends travelers avoid all nonessential international travel to Nepal.

- Nepal is still under lockdown. However, it is opening up to trekkers, but with strict measures. Visitors will need a negative Covid-19 PCR test within 72 hours of travelling. They will then have to quarantine in a hotel for seven days at their own expense. On day five, at the government's expense, they will have another test, and assuming that is negative they will be able to leave and continue with their plans on day seven.

- Flights to Nepal are available only to diplomats and VIPs.
  - This does not apply to medical and repatriation flights.

- Passengers are subject to self-quarantine for 14 days.

Hong Kong Covid situation update as at 06 Dec 2020
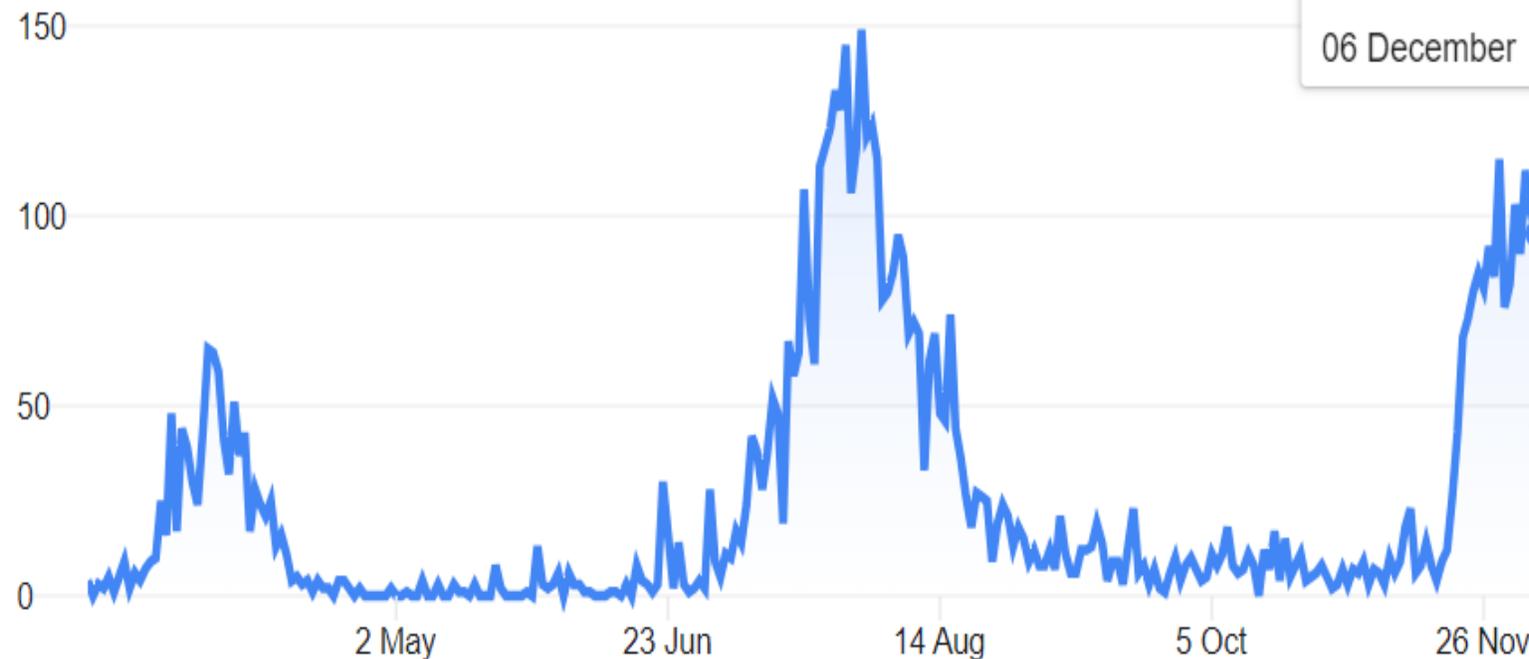

Confirmed cases 7,071

Recovered 5,626

Deaths 112

- The launch of the much-anticipated travel bubble to facilitate leisure travel between Singapore and Hong Kong has been further delayed to next year, amid a rising number of Covid-19 cases in Hong Kong.

- The bilateral air travel bubble, will exempt travellers from quarantines or stay-home notices. Those travelling under the bubble will have no restrictions on their travel purpose and will not need to have a controlled Itinerary.

- However, travellers will need to test negative on mutually recognised COVID-19 polymerase chain reaction (PCR) tests. They will also be required to go on flights dedicated for those travelling under the bubble.

· About this data

Summary as of 06 December 2020

Based on the current spread of Covid 19 in the various regions, we have made the following observations:

1. In SEA, except for the spread flattening in Singapore and Timor Leste, infections in Malaysia are suddenly spiking and still on the increase. In Indonesia the case numbers are high, exceeding 6,000 cases daily, while in the Philippines it is spiking periodically with case numbers around 2,000 daily.

2. In Indochina, the spread seems to be flattening in Thailand and Vietnam. However, there were spikes in cases in Cambodia recently. Although on a downward trend, case numbers are high in Nepal and on the increase in Myanmar, with cases numbering between 1500 to 2000 daily in both countries.

3. In South Asia, the spread is still very high in India with case numbers around 50,000 daily, although the curve is moving downward. In Sri Lanka, there is a sudden erratic spiking on an increasing trend, inching its way towards the high hundreds daily.

4. In East Asia, the spread in Japan is now on an upward trend since mid October, with current daily infections of more than a 1500. There are also sudden spikes in Mongolia, Taiwan and Hong Kong this past week. However, in China the numbers a flattening out although there is an expected resurgence in the winter months in some cities.
