UPDATE
BY COUNTRY**

AS AT 10 April 2021

SINGAPORE BORDER CONTROL MEASURES

For Singapore Residents and Long-term Pass Holders

Singapore's borders are now reopening gradually to allow safe travel in limited numbers, with the necessary safeguards in place to ensure public health considerations are addressed.

You may visit these websites for more COVID-19 related information in Singapore:

- [MOH Website](#) for updates on the COVID-19 local situation and the relevant advisories; and
- [MCI COVID-19 Info Bot](#) for summarised information from various government agencies.

Short-term visitors are not allowed entry into Singapore, except those coming in under the Green/Fast Lane arrangements, the Air Travel Pass or with special prior approval.

All approved travellers must abide by the requirements on COVID-19 prevention and control and prevailing public health regulations of the receiving country. More information on the various entry requirements for various countries can be found [here](#).

- All Singaporeans and residents of Singapore are advised to defer all travel abroad. However, essential business and official travel will be permitted under Green/ Fast Lane arrangements
- Check the [MFA website](#) for the latest travel advisories to other countries/regions
- Check with the immigration authority or embassy of the destination country/region on the relevant health requirements imposed on travellers from Singapore, such as Pre-Departure Tests to be taken

Indonesia Covid situation update as of 10 Apr 2021

Confirmed cases 1.56 million

Recovered 1.41 million

Deaths 42,443

5.08M (1.9%) of population fully vaccinated so far.

- Members of the public should take note that a temporary ban on the entry and transit by all foreign nationals is currently in force in Indonesia.
- Indonesia announced an internal travel ban during next month's Eid al-Fitr celebrations, in an effort to prevent large-scale transmission of the coronavirus, a transport official said.
- The halt on sea, land, air and rail travel for the May 6 to May 17 holiday adds to a ban announced last month by Indonesia on the mass exodus tradition, where vast numbers of people head en masse to their home provinces.

Timor Leste Covid situation update as of 10 Apr 2021

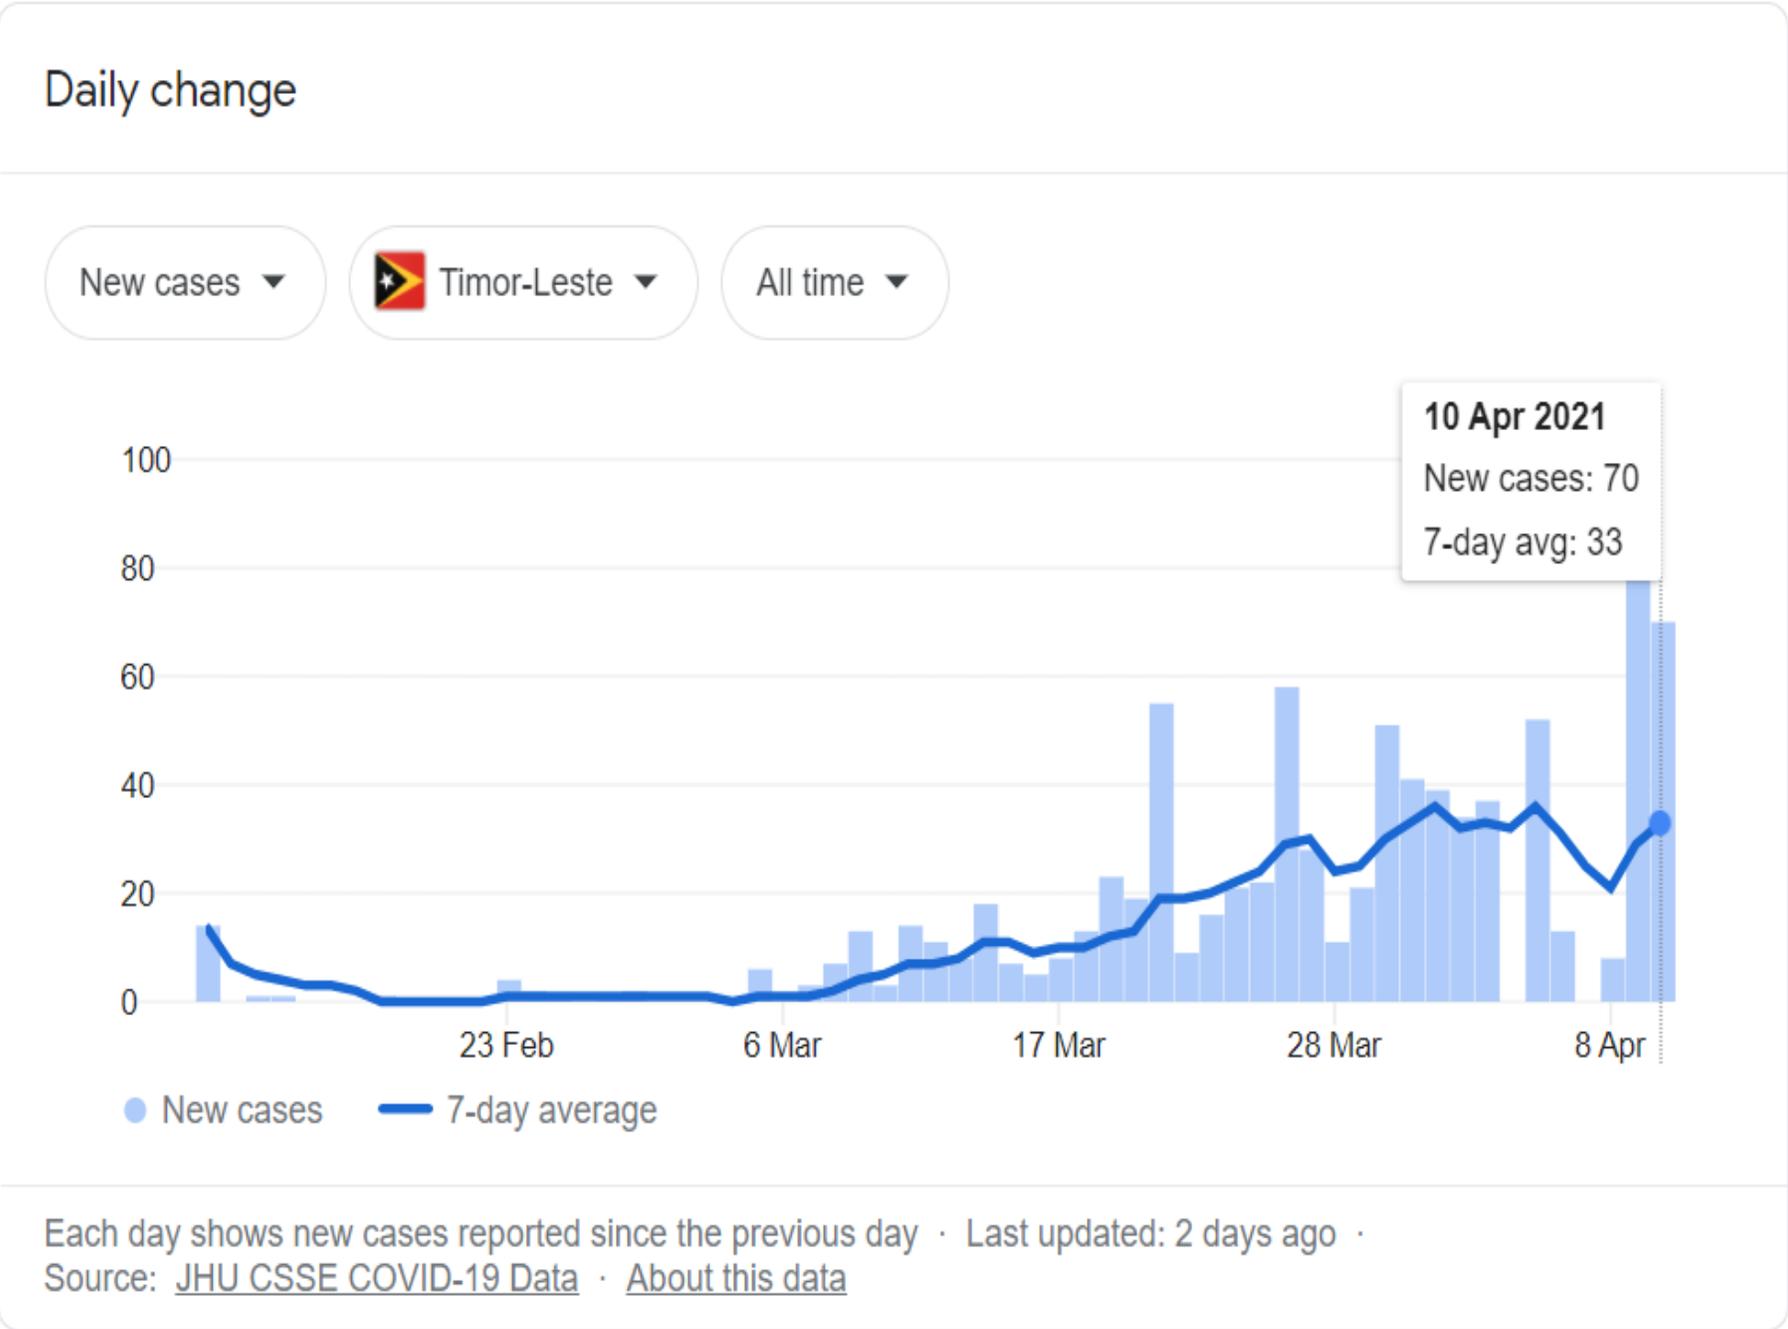

Confirmed cases 947

Recovered 443

Deaths 1

Covid Vaccination program aimed to start in early April 2021

- The first batch of COVID-19 vaccines arrived in Timor-Leste on April 5, bringing a renewed sense of hope to the tiny Indo-Pacific nation simultaneously enduring devastating floods and a capital city in strict coronavirus lockdown.
- No flights to Timor from Singapore are available.

69,439 people (0.1%) have been fully vaccinated so far.

- Travelers from [56 countries](#) can now enter Thailand under the Visa Exemption Scheme. However, these travelers still need to comply with Thailand's 14-day mandatory quarantine and show proof of a negative PCR test.
- The current area-based control measures have allowed most part of the economy to continue to operate as usual. However, looser restrictions mean that it could take longer before the country can virtually eliminate local infections, like it did with a nationwide lockdown last year.
- Some restrictions may still remain in place as the country starts its vaccine roll-out to reach its target of covering 50 per cent of the population by the end of this year.

Cambodia Covid situation update as of 10 Apr 2021

Confirmed cases 4,081

Recovered 2,080

Deaths 26

266K people (1.6%) have been fully vaccinated so far.

- Health officials in Cambodia are maintaining international travel controls aimed at preventing the spread of coronavirus disease (COVID-19) activity, while easing domestic businesses restrictions.
- All foreigners arriving in Cambodia will now be subject to a COVID-19 test on arrival (as well as requiring a COVID negative test before flying). They will need to remain at a hotel or government facility until the results are known, which may include an overnight stay.
- The sudden spike of the number of COVID-19 cases has sent shock waves around the capital where a 8 pm to 5 am Curfew has been in place since 1 April. Now people fear more severe measures may come into play or be imposed by the government.

12.7m (0.9%) of population fully vaccinated so far.

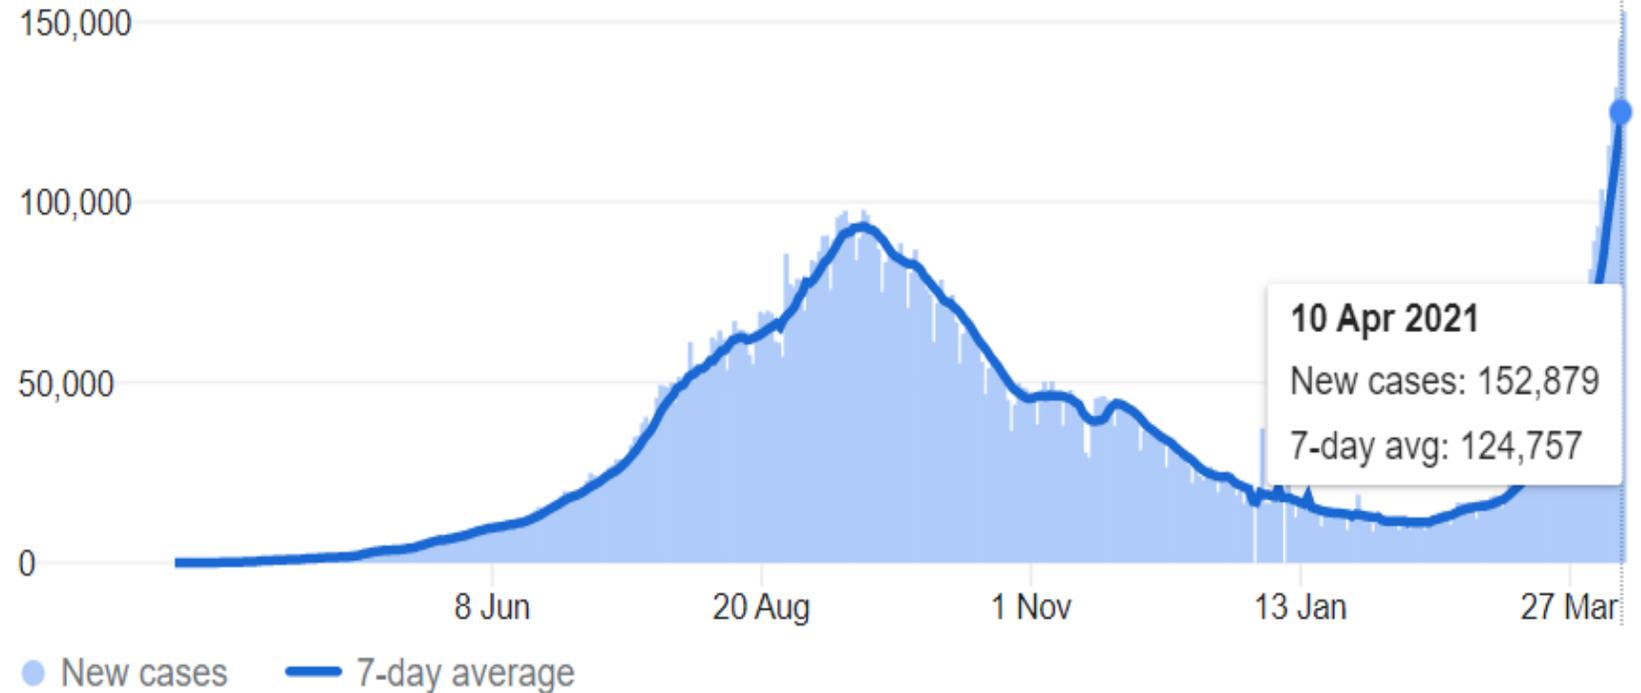

- India's daily infections have risen many fold since hitting a multi-month low in early February, when authorities eased most restrictions and people largely stopped wearing masks and social distancing.
- India has recorded the most number of infections in the past week anywhere in the world. More infectious variants of the virus may have played a role in the second surge, some epidemiologists say.
- The Delhi government also announced a night curfew in the capital which is home to 25 million people, until Apr 30.

Source: [JHU CSSE COVID-19 Data](#) · [About this data](#)

Summary as of 10 April 2021

Based on the current spread of Covid 19 in the various regions, we have made the following observations:

1. In SEA, except for the spread flattening in Singapore, infections in Malaysia and Indonesia are on a downward trend although case numbers are still very high with the daily average exceeding 5000 cases for the past week. In Timor Leste the cases have suddenly started to spike with an average of 33 cases over the past week, while in the Philippines it has escalated to over 12 thousand cases with an average of almost 10 thousand cases a day for the past week.
2. In Indochina, the spread has been on a downward trend with some plateauing out in Vietnam, Nepal and Myanmar while in Thailand and Cambodia cases continue to spike. However, with the protests in Myanmar, the figures may be inaccurate.
3. In South Asia, the spread is still very high and climbing, with India seeing a daily high of more than 150 thousand cases on 10 April, and a daily average of about 125 thousand last week. India is now the third highest covid infected country in the world. In Sri Lanka, the number of cases have begun to decrease, although still being in the range of 220 cases daily for the past week.
4. In East Asia, the spread in Japan is still high with an average of close to 3000 cases daily over the past week. However, Mongolia cases have begun to climb again with an average of more than 655 cases daily for the past week. Cases remain low in Taiwan and Hong Kong, while in China the numbers are flattening out.
5. With covid vaccinations having started in many Asian countries, it is hoped that numbers will begin to be controlled. However, reports in only some countries indicate the percentage of population that has been fully vaccinated. As some vaccinations require two doses, the number of doses administered do not indicate the number of people who have received the full vaccination. Timor Leste is expected to start vaccinations in April.
