UPDATE
BY COUNTRY**

AS OF 7 November 2021

SINGAPORE BORDER CONTROL MEASURES

For Singapore Residents and Long-term Pass Holders

To minimise the public health risks associated with the border reopening, travellers arriving in Singapore may be required to observe the relevant health control measures such as **Covid-19 tests** and **Self-Isolation and Segregation Measures**.

As part of Singapore's efforts to reopen our borders safely, fully vaccinated Singapore Citizens (SCs) and Permanent Residents (PRs) departing for Singapore from the following countries may return via the Vaccinated Travel Lane (VTL) to enjoy quarantine-free measures on return to Singapore. Travellers must arrive in Singapore on a designated VTL flight in order to be eligible for the VTL

From 18 October 2021, 2359hrs, travellers to Singapore must have only been to one or more of the [VTL countries/regions](#) and/or Singapore, in the last 14 consecutive days before departing for Singapore.

To tackle the COVID-19 situation, many countries have imposed entry restrictions and border closures. Please refer to the [International Air Transport Association \(IATA\) Travel Centre website](#) when planning your travel routes. As the measures imposed could result in flight cancellations and reduction in flight frequency, you are advised to check with your airline or travel agency to ensure that your flight routes are still operating prior to departing for the airport.

- Check the [MFA website](#) for the latest travel advisories to other countries/regions
- Check with the immigration authority or embassy of the destination country/region on the relevant health requirements imposed on travellers from Singapore, such as Pre-Departure Tests to be taken

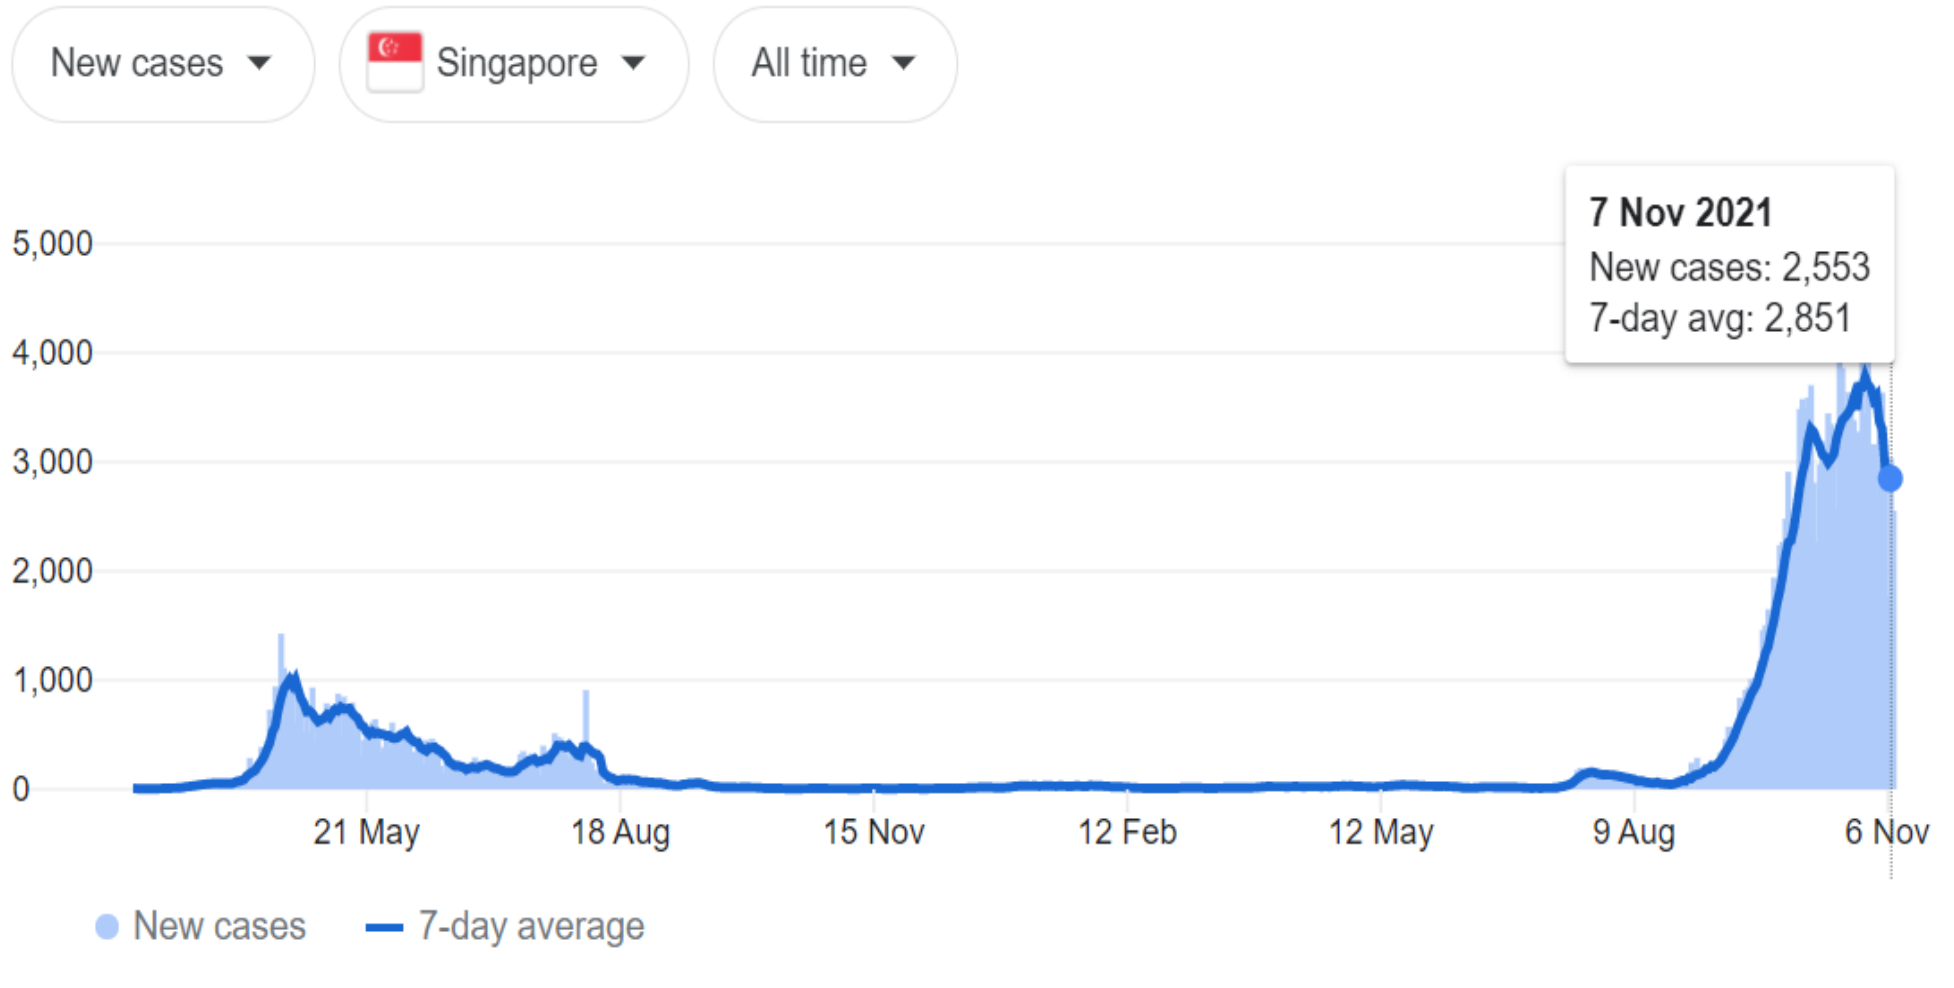

Singapore Covid situation update as of 7 Nov 2021

Confirmed cases 218K
Deaths 514

4.7M (**82.7%**) of population has been fully vaccinated to date.

Timor Leste Covid situation update as of 7 Nov 2021

Confirmed cases 19.799

Deaths 122

354K (**26.8%**) of population have been fully vaccinated to date.

- The Government of Timor-Leste has extended its State of Emergency until 28 November 2021. During this period, airports, ports and land borders will remain closed as there continues to be a significant number of COVID infections in the country. During the above mentioned period of closure exceptions will apply.
- Entry restrictions apply to all travellers (air, land and sea) and can change with little notice. You must provide a negative COVID-19 test on arrival. You'll be subject to mandatory quarantine at a location determined by authorities, likely at your own expense, and additional testing. You may be asked to provide details on your vaccination status.

Myanmar Covid situation update as of 7 Nov 2021

Confirmed cases 507.8K
Deaths 18,838

7.05M (13%) of population have been fully vaccinated to date.

- Myanmar has announced that it hopes to begin welcoming international tourists in early 2022.
- While most nations that closed their borders over the past two years did so solely to prevent the spread of Covid-19, but Myanmar is also still dealing with the aftereffects of a February 2021 coup in which a military junta overthrew the country's democratically elected government.
- Meanwhile, some international travelers are being warned by their own governments to stay away, due to both Covid concerns and instability in the wake of the coup.

Summary as of 7 November 2021

Based on the current spread of Covid 19 in the various regions, the following observations have been made:

- In living with Covid-19, Singapore is taking concerted steps to open travel lanes with more places where people can travel to and from without quarantine. The experience to date with the Vaccinated Travel Lanes (VTLs) has shown that Singapore can open up air travel in a safe way. The government will further simplify travel protocols to safely and seamlessly reconnect with the rest of the world.
- Covid infections have dipped in Malaysia, Indonesia, the Philippines and in Timor Leste over the past week. However, except for Singapore and Malaysia, the vaccination rate in the other SEA countries remains low, below 30 per cent.
- In Indochina, the spread is on a downward trend in all the countries. However, cases remain high in Thailand and Vietnam, while cases have fallen sharply in Nepal, with a downward trend in Myanmar and Cambodia. Except for Cambodia which has a vaccination rate of about 70% of the population, and Thailand with almost 50% of the population fully vaccinated, the other countries in Indochina have very low vaccination rates for their populations.
- In South Asia, the spread in India is plateauing to a daily average at about 11 thousand cases, while in Sri Lanka cases have dropped to a daily average of around 600, this past week. Vaccination rate in India remains low at below 25% for the large population. However, Sri Lanka has picked up the vaccination rate and has vaccinated more than 60% of the population.
- In East Asia, the spread in Mongolia is on a downward trend averaging daily at around 1,000 cases. Japan has seen a good recovery and is now averaging below 200 cases daily. In Taiwan and Hong Kong cases have plateaued to single digit numbers while in China, cases are averaging at 80 cases daily this past week. Except for Taiwan, the region is doing well in their vaccination exercise.
